

Assignments [Professional Ethics and Social Values-EAN11700, Batch: Electrical Engineering]

Instructions:

- Do not plagiarise. Originality of the answers will be rewarded.
- Total Marks: 20 (10 marks each)
- Maximum Length: 2 pages for each question
- Submit Assignment 1 and Assignment 2 as separate documents
- Last Date of Submission: 16 April 2025, Wednesday
- Note: Late submission will result in the reduction of marks.
- Submit a handwritten hard copy of the assignment

Assignment I – UNIT V: Professional Ethics in Electrical Engineering

Discuss the importance of professional ethics in the field of electrical engineering. Imagine you are part of a team responsible for designing and implementing an electrical system for a public infrastructure project. What ethical considerations should guide your decisions related to safety, cost, sustainability, and transparency? How would you ensure that your engineering choices serve the larger public interest?

Assignment II (Corporate Social Responsibility [CSR])

Choose an engineering or technology-based company (preferably in the electrical or energy sector) and examine one of its CSR initiatives. Discuss how the initiative aligns with CSR principles, and critically evaluate its impact on the community, environment, or stakeholders. What can future engineers learn from this example about ethical and socially responsible professional practice?
